

Exclusive Alu-Tech caravan wind out awnings from Fiamma

An exclusive range of Fiamma wind-out awnings designed specifically for use with Alu-Tech construction caravans is now available from your local Bailey Retailer

Easy to operate and quick to erect the Fiamma F45 series of wind out awnings create a covered outdoor area that doubles the living space of your vehicle. The awning can be fitted to all Bailey Alu-Tech caravan ranges and is available in a variety of lengths to suit individual model requirements. It comes in a choice of either Deluxe Grey or Blue Ocean canopy colours with a Polar White canopy casing.

The canopy can be upgraded with the installation of either a Fiamma Privacy room or Fiamma Zip System both of which allow you to create a fully

enclosed living area. The panels for the Privacy Room and the Zip System operate independently of one another to give flexibility of use to suit weather conditions and ventilation requirements. Both come complete with curtains for all windows and a convenient storage bag to keep all parts safe whilst in transit.

Contact your local Bailey Retailer for more information.
